This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

The objection can be overcome by filing a PTO/SB/53 form.

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a)(1) and MPEP § 1414.

In the declaration filed 11/16/2005, the error upon which reissue is based is stated as "Claims 1, 6, and 7 were amended to recite that the claimed ethanolate of azithromycin is non-hygroscopic to more fully distinguish over US 4,475,768 to Bright which discloses a hygroscopic azithromycin compound". However, note that in the claims filed on 6/26/2009, claims 1 and 7 were amended as being directed to an ethanolate of azithromycin "wherein the ethanolate is less hygroscopic than azithromycin monohydrate".

Claims 1-7 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declarations is set forth in the discussion above in this Office action.

The disclosure is objected to because of the following informalities: the specification is objected to for having a formula not the same as the one the applicant has put in as the ethanolate in the registry file of chemical abstracts.

For example, note that in the structure set forth in the registry, the sugars at positions 3 and 5 are attached by solid lines while in the structure set forth in the specification, said sugars are attached by the dashed lines.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-7 directed to the compound of ethanolate are vague and indefinite as to whether the compound being claimed is the compound found in the specification or the compound found in the registry number given by applicant as his ethanolate.

Claim 7 is directed to an ethanolate of azithromycin that is characterized by a powder x-ray diffraction substantially as depicted in Fig.2. There is no presence or definition of the term "substantially" in the specification. Therefore, the term "substantially" is vague and indefinite as to what the metes and bounds that applicant considers his invention since it is a relative term.

Applicant's arguments filed 6/26/2009 have been considered but are moot in view of the new ground(s) of rejection.
